

## Application

The MP Series actuators are for two position, spring return applications. When power is supplied to the actuators, they open (or close) the damper (depending whether the system is set up as 'fail close or fail open'). When the power is removed, either purposely or by a power failure, the spring returns the actuator to the opposite position from that of which it was powered.

The MP series actuators are available in voltages of 24V, 120V, 208V, 220V, 380V, 440V.

## Construction

- Housing:** Die cast aluminum.
- Bearings:** Bronze, semi-oiless, maintenance free
- Gears:** Precision machine cut

	24V (60Hz)	120V (60Hz)	208V (60Hz)	220V (60Hz)	440V (60Hz)	24V (50Hz)	220V (50Hz)	380V (50Hz)	440V (50Hz)
